GEL 75 ml tube dermatologically tested (€ 4,50)

It relieves symptoms such as heaviness, tension and tiredness in the limbs. Recommended as an aid in the improvement of spraying in the lower limbs in case of skin blemishes. Thanks to a special pool of vegetal functional ingredients brings relief and a pleasant sense of freshness, lightness and well-being of the lower limbs under conditions of slowed peripheral circulation. Recommended as an aid in the reduction of lymphedema from prolonged immobilization. Capill[®] gel, can be applied several times a day depending on the needs even on sensitive skin, as characterized by an excellent skin tolerance. Capill[®] gel is formulated to allow a rapid and complete penetration of active ingredients contained in it, the gel is easy to apply and is quickly absorbed.

Capill[®] gel, in addition to functional vegetable substances, such as total terpenes (extracted from Centella asiatica), coumarin (extracted from Melilotus officinalis), escin (extracted from Aesculus hippocastanum), ruscina and ruscoides (extracted from Ruscus aculeatus) Extract, Aloe barbadensis leaves in unsaponifiable olive oil, produces a beneficial draining and decongestant. In addition, panthenol, hyaluronic acid and betaine ensure a good moisturizing.

PILL[®] RETARD 30 tablets of 950 mg slow-release (€ 5,50)

Dietary supplement with titrated extracts of Melilot, Centella asiatica and Vitis vinifera. The alteration of the trophism of the microcirculation's vessels determines increase in endothelial permeability and consequent formation of edema with the relative reduction of blood flow. The demonstrations will highlight with the following:

- In the lower limbs, with heavy legs, tingling, swelling, inflammation, cramps
- in the hemorrhoidal plexus, with inflammation, congestion, edema and tenesmus
- in the district eye, with swelling, inflammation, and failure of chorio-retinal microcirculation
- in the ORL, with symptoms of epistaxis.

Through its members, all of vegetable origin titrated and standardized with a high content of active ingredients can help by encouraging the natural defenses of the capillary barrier, the control of the inflammatory process, and the elasticity of the vascular permeability.

MI®Gel spray and MI®Gel spray

Hydrating gel for the maintenance and restoration of the physiological functions of the nasal mucosa. The functions explicates by the nasal mucosa in the physiology of respiration are schematically belong to three activities: filtration, humidification, warming of inspired air. The assumption that such activities are insured is based on integrity morphofunctional of the nasal mucosa. MI®gel spray helps restore the hysiological functions of barrier of the nasal mucosal and plays hydrating action

with protective effect to the damage caused by irritative processes.

€ 4,50

€3,90

NosVita (€3,90) dietary supplement of lactic ferments and vitamins 7 vials of 10 ml with measuring cap. RamnosVita is a food supplement made with lactic ferments and vitamins in high concentrations. It's useful to give body a portion of these additional nutrients in the presence of food shortages and increased need. It may also be useful to balance the intestinal bacterial flora altered due to an improper diet or antibiotic therapies. RamnosVita is a symbiotic product, in which probiotic lactic ferments and prebiotic galacto oligosaccharides are used in combination to ensure better survival of microorganisms and rapid revival of the correct composition of the intestinal flora.

Nosvita™ Fast (€ 4,0) is a dietary supplement of lactic ferments "probiotics" highly concentrated, and vitamins with prebiotic fiber, useful for making an additional portion of these nutrients in the presence of food shortages and increased need.

Ramnosvita™ Fast is useful to keep the "natural" balance of intestinal flora and, if altered, helps to bring it back to its original state. The original formulation, directly soluble in the mouth, is an easy and pleasant way to take lactic ferments. Ramnosvita™ Fast contains: 4 strains of live lactic ferments, B vitamins, vitamin K1; Fibersol-2. Ramnosvita™ Fast is a product symbiotic, in which special lactic ferments probiotic and prebiotic fiber (Fibersol-2) act in synergy, ensuring better survival of beneficial intestinal bacteria and rapid recovery of the intestinal microflora in cases of alteration.
